

Rohan Grover

grohan95@gmail.com | +91-8800276281 | <https://ronork.github.io>

Software Engineer focused on building reliable user-facing applications and the systems that power them — with an emphasis on simplicity and scale.

Skills

Frontend

HTML, CSS, JavaScript (ES6+), React, Electron

Backend

Node.js, PHP, Laravel, MySQL, MongoDB

Tools & Platforms

Git, VS Code, Postman, Docker, Webpack, Babel, Jira

Work Experience

07/2022 – present
Bengaluru, India

Software Engineer, *Postman*

- **Postbot**  Contributed to Postman's AI-powered assistant by building intelligent services and data visualization features, aiding developers in faster debugging and API understanding.
- **gRPC & GraphQL Support**  Added support for gRPC Examples and helped build GraphQL protocol support, broadening Postman's API compatibility and improving request documentation.
- **Streamlined variable management**  for users sending requests, enhancing visibility into missing variable values, leading to more efficient API testing
- **External Package Support**  Built support for external packages in Postman scripts, resolving long-standing community issues  and unlocking advanced scripting capabilities for users.

09/2020 – 07/2022

Full Stack Developer, *GlobalSign.in*

- Built **GEVME Meet**, a video conferencing solution using AWS Chime, enabling event attendees to interact over video and screen share.
- Developed a **performance auditing tool** using Lighthouse CLI and AWS S3/EC2 to monitor lab metrics.
- Optimized real-time widgets (Polls, Headers, Notifications) for GEVME's digital event platform.
- Implemented a **Job Scheduler** using Node.js and worker threads to automate time-based tasks.

06/2018 – 09/2020
Noida, India

Software Programmer, *Indiamart Intermesh Ltd.*

- Integrated Google Bot-friendly routing for React-based Single Page Applications.
- Improved JS resource versioning and chunk naming for faster client updates and easier debugging.
- Reduced 5XX error occurrences on deploys by offloading bundling to a dedicated server.
- Built responsive pages using React and Redux for a seamless mobile experience.

12/2017 – 03/2018
New Delhi, India

Intern, RedCarpet Tech Pvt. Ltd 

During the period of this internship I was responsible for testing their official android application using 'Android Espresso' and 'JUnit' along with testing their API that handles the application requests using 'pytest'.

06/2017 – 08/2017
New Delhi, India

Intern, ROSOL PVT. LTD 

I worked in the web design and development team as one of the member for developing the company's official website.

Education

2014 – 2018
Delhi, India

B.Tech Computer Science and Engineering, Guru Gobind Singh Indraprastha University
Aggregate - 78.6%

2013 – 2014
New Delhi, India

class 12th,ISC, The Frank Anthony Public School
Aggregate - 90%

2011 – 2012
New Delhi, India

class 10th,ICSE, The Frank Anthony Public School
Aggregate - 87%

Awards

10/02/2022

Star Performer, GEVME

10/12/2021

Star Performer, GEVME

06/2019

Best Performer of the Month, IndiaMART InterMESH Ltd.

12/2018

Emerging Star of the Month, IndiaMART InterMESH Ltd.

Projects

2017

Samyog, A free portal aimed at creating a space where projects and volunteers working for providing free education to underprivileged children, could easily connect and interact. 

- It was created as a proof of concept to show that small scale non profit organisations require such a platform.
- Laravel Framework was used to create the web application along with MySQL to manage the database. The site was deployed using EBS service of AWS.
- Around 100 organisations registered on the website using their email and published their need of volunteers.

2016

Arithmos 

A website that allows user to search through algorithms, aimed at encouraging users to concentrate on the logic of the problem rather than syntax of languages.

Interests

Solving Puzzles, Cycling

Languages

English — Full Working Proficiency • **Hindi** — Native
